

DURANIT®

DURANIT®

Duranit Safe panels are autoclaved, doubly compressed boards, reinforced with a fiberglass mesh glued on the backside; they are manufactured according to EN 12467: 2012 + A2: 2018. This product has been designed to meet total safety requirements in multiple applications.

Through Coloured Range

Through coloured range is available in the following treatments

Painted Range

Hydro/HydroPlus Standard

The through colored surface has an extremely material appearance that is enhanced over the years.

– Thirteen different through coloured shades and a smoothed surface give **Duranit** Hydro and Hydroplus finishing boards an extremely natural appearance, which is their main feature.

– Non uniform colours and some small imperfections of the surface are a feature of the product.

– Colours, even through reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Groove

Deep lines run along the length of the board and give the fibercement a natural soul, giving it a wooden effect. Groove finishing, as well as giving value to the surface, looks pleasant and modern.

- Available in 13 through coloured tonalities with hydro and Hydroplus finishing.

- Non uniform colours and some small imperfections of the surface are a feature of the product.

- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

- Groove lines run along the length of the panel only

Hydro/Hydroplus Rigo

Regular millings run parallel on the surface, creating unique lights effects.

- Available in 13 through coloured tonalities with Hydro and Hydroplus finishing.
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- An installation that allows water to flow along the facade is recommended
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Sandblasted

The particular process technique on the surface gives an irregular and worn out effect, and, at the same time, a refined look that highlights the soft through coloured tones of the product.

- Available in 11 through coloured tonalities with hydro and Hydroplus finishing.

- Non uniform colours and some small imperfections of the surface are a feature of the product.

- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Stripes

The surface characterised by continuous lines is interrupted by regular cavities. The Board looks like an assembly of wooden boards, and recalls a slat effect, typical of dry constructions.

- Available in 13 through coloured tonalities with Smoothed or Groove surface and Hydro or Hydroplus finishing
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Surface

The interesting work done on the surface gives the board a particular rustic and irregular look. Having a great aesthetic impact, the surface gives off a natural colour effect which is of great value.

- Non uniform colours and some small imperfections of the surface are a feature of the product.
- **Duranit** Surface is available in three through colours with Hydro and Hydroplus finishing.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

011 - Pietra

030 - Grigio

020 - Naturale

Through Coloured Range

Finishing Crystal

The natural nuances of the board are intensified by an acrylic transparent finishing that gives brilliance and intensity to the base colouring. Thanks to the elaborate process of application of paint on both surfaces and to the protection on the sides, the board obtains specific features resistant to graffiti, salt fog and to sulfur dioxide.

This kind of treatment encourages the application of these boards in urban zones with high smog density and near the sea. For cuttings done on building sites, we advice that the cut edges should be treated before being set. Acrylic transparent anti graffiti treatment is available only for **Duranit** with standard finishing.

- The product is available in 13 through colours.
- Non uniform colours and some small imperfections of the surface are a feature of the product.

- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.
