

OBSIDIAN

DURAMICA® 

In ancient times, obsidian was used for tools, weapons, and jewelry. It was also used to create mirrors, believed to have spiritual properties. In addition, obsidian was used in trade between cultures, as it was seen as a sign of partnership and mutual respect.

Today, obsidian is used for many of these same purposes. It is still valued for its unique beauty and is used in jewelry and other decorative items. It is antibacterial, an excellent heat conductor, extremely rich in silica (about 65 to 80 percent), low in the water, and has a chemical composition similar to rhyolite.

You have probably heard that Armenia is known as the country of stones. It is not accidental at all. In addition to the raw materials for facing construction and building materials, about 9 types of semi-precious and precious stones have been found, explored, and industrially evaluated in the Republic.

Obsidian is technically not a “rock” because it is not made of mineral crystals. It is really a congealed liquid that contains trace quantities of rock impurities and micro mineral crystals. Obsidian has an usual hardness of 5 to 5.5 on the mineral hardness scale, making it moderately soft. About 70% or more of obsidian’s composition is non-crystallized silica (silicon dioxide). It shares chemical similarities with the molten minerals granite and rhyolite.

Whether used for decorative purposes or practical applications, our obsidian stone is sure to exceed your needs. It is known to be extremely durable, making it a great choice for both indoor and outdoor projects. Additionally, it has antibacterial properties that will keep your creations safe and germ-free for years to come.

Its fine-grain texture allows for a beautiful polished look, making it ideal for ornamental installations.

Obsidian stone is simple to work with and is easily carved, polished, and cut into various shapes. Beautiful jewelry, sculptures, and other ornamental objects may be made using it.

Black obsidian stone is a strong psychic protection stone and purifier of psychic pollution produced within your aura. This stone’s potent metaphysical qualities will work as a protective barrier for you.

Due to its inherent beauty and strength obsidian stone may be utilized to lend a sophisticated touch to any project.

Introducing Armenian Obsidian stone – the premier heat-conducting, durable stone. Ideal for many types of applications, this unique stone is renowned for its superior thermal, antibacterial properties.
