

UNLIMITED STONE FACES

**DURAMICA<sup>®</sup>**

LIGHTWEIGHT STONE TERRAZZO

The Swiss Company G.P.Grant Group began its history with the making of exclusive artworks for the interior from very rare and elite gemstone, precious stone, minerals and noble metals. The company performed very difficult and exclusive orders of hewing elite stone types, giving unique beauty to each product.

In the process of working with natural stone, new stone products have been developed that allow to expand the possibilities of using stone. A line of Duramica composite stones was created – a thin layer of natural stone on a ceramic, metal or glass surface. Duramica products make it possible to embody the most complex designs and products for facades and interiors from stone.

Modern production line Duramica, located in Xiamen and is fully controlled by the Swiss specialists of the company. The decision to open production in Xiamen was made due to the presence of a huge amount of natural stone from around the world. All the stones presented in the Collections are available, close to the production. Products are fully manufactured in accordance with Swiss know-how. The final products fully comply with Swiss quality standards.

## **DuraSkin Terrazzo**– terrazzo stone on ceramic base

### **DuraSkin Terrazzo**

Standard formats: 300 x 600 mm ≤, 1200 x 600 mm ≤

Stone thickness: 3 mm ≥

Ceramic base thickness: 9 mm

Weight (kg/m<sup>2</sup>): ± 36-37,5 kg

Area of use: facade, interior, floor

### **DuraSkin Terrazzo XL**

Standard formats: 2400 x 1200 mm ≤

Stone thickness: 5 mm ≥

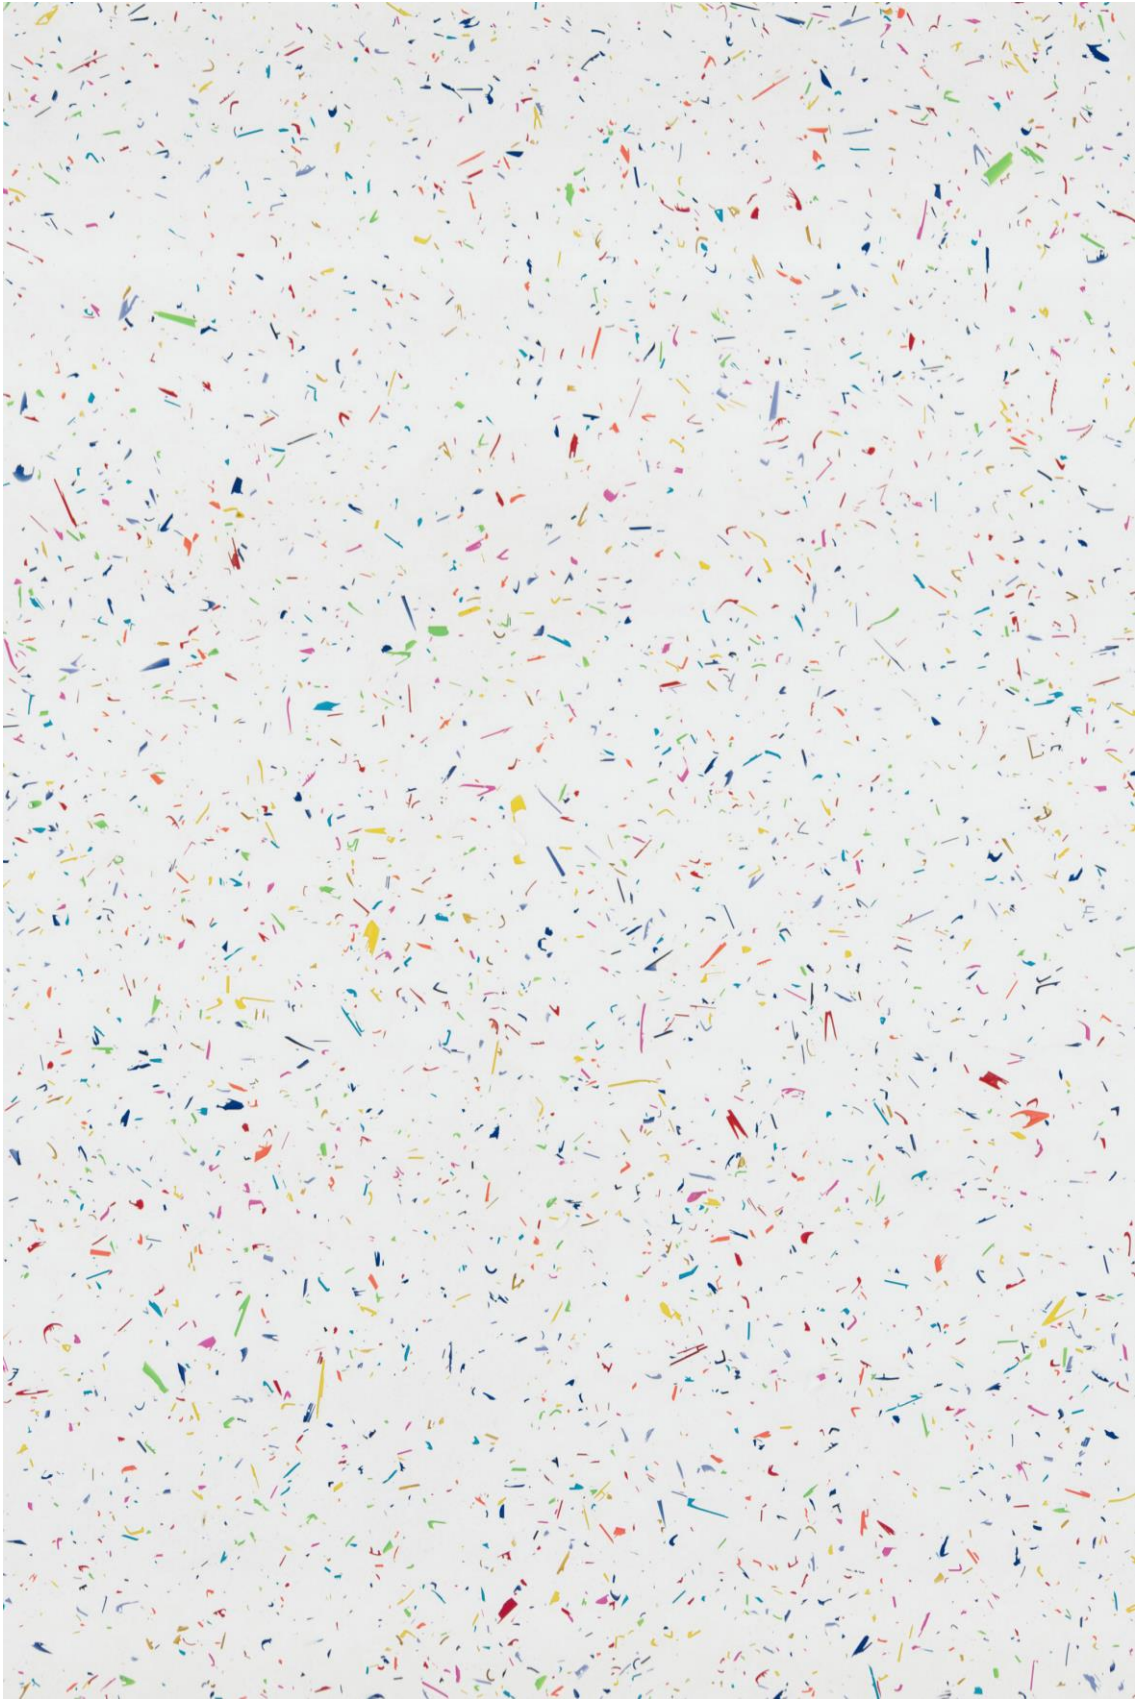

Ceramic base thickness: 9 mm, 12 mm

Weight (kg/m<sup>2</sup>): ± 37 kg, ± 43 kg

Area of use: facade, interior, floor
